I am trying to get this to ARSG by the end of next week so they have time to review prior to the meeting in April. Loose ends are being tied up still but it should be close.

Right now I am looking for significant comments that would need to be addressed prior to sending out. Small stuff can be dealt with later IMO.

I am in the process of reading it also..

Dan,

There are a few appendices that still need to be attached and these are some older tox reports and species lists that I will get wrapped up this week.

Heading to Nelson Tunnel – Give a call if you need anything

Steve
